7 August 1963

**MEMORANDUM FOR: The United States Intelligence Board**

**SUBJECT: Supplement to Biweekly Report on High-Level Coverage of Cuba**

**REFERENCE: USIB-D-41.14/60**

1. On 6 August the mission took advantage of clearing weather and covered the eastern tip. The pilot estimates 75% coverage of targets. Today a mission is planned to take advantage of good weather on north and south coasts in the center of the island. Tomorrow's estimate of the weather calls for improving weather over the western end of the island.

2. If today's mission gets 65% of the scheduled targets and tomorrow's weather improves in the area predicted, any slump resulting from the lack of missions for two days should be satisfactorily overcome.
